

Date	May 2026
Attendees	Mr. Smith (PM) · Danielo Garcia (Studio Sales Mgr) · Victor (Technical Content) · + Others
Distribution	Internal — Danielo Garcia, Victor, Sharif, Brendan Bailey

EXECUTIVE SUMMARY

A wide-ranging working session covering three main areas: (1) content strategy for case studies and a sizzle reel, (2) the technical migration from WebLogic to Aperture and what that unlocks, and (3) product category structure and merchandising for the Studio's B2B landing experience. The overarching theme: The Studio needs to stop presenting like a gear vendor and start presenting like a capable systems partner — on the website, in video, and in the field.

1 — CORE STRATEGIC DIAGNOSIS

From Danielo interviews:

- **No narrative presence.** No portfolio, no case studies, no virtual production representation.
- **No competitive signal.** Nothing on the site distinguishes The Studio from AbelCine or CVP.
- **Internal awareness gap.** Even within B&H; and at industry events like NAB, The Studio's existence isn't broadly known.
- **Future opportunity flagged:** A dedicated Studio booth at NAB (separate from main B&H; presence) is being discussed — not finalized, keep between stakeholders.

2 — CASE STUDIES

What's Needed

- 3–5 case studies with real imagery, client quotes, and outcome data
- Video is the ideal format; photo + paragraph is the floor
- CIA / Cleveland Institute of Art XR Stage is the hero case study candidate (~\$1M project, B&H; as consultant + equipment provider)
- Need to confirm permissions to use CIA imagery — team may be able to travel to Cleveland for a half-day shoot
- **Fullwall / Zero Space (Brooklyn)** is the backup — Matthew or Ben may be willing to go on camera
- **LABC (LA)** mentioned as a third option; logistics TBD

Asset Inventory

Asset	Status / Notes
NAB booth footage (sizzle in progress)	Limited scope; being finalized by team
CIA footage from disguise	Log/flat — usable for motion background clips
NAB panel clips (broadcast + VP demos)	Available
Virtual production car demo clip	Noted as strong footage
Osmo footage (Megan)	Zip/codec issue — extract first, then decompress
Panel sponsor clips (Megapixel, disguise)	Potential B-roll for software/switcher sequences

3 — SIZZLE REEL PILLARS

Four narrative pillars proposed for a ~60–90 second sizzle video:

#	Pillar	Description
01	Trust / Expertise	We are practitioners, not salespeople. Deep manufacturer relationships.
02	Approach / Bedside Manner	Consultative, patient, solutions-first. Matters in NYC industry culture.
03	Process	Requirements through sign-off. Manages expectations. May be too dense for 60s — TBD.
04	Proven Track Record	Name drops, project scale, client outcomes. By the numbers format.

Additional differentiators to weave in:

- B&H; scale advantage: 500K+ SKUs, manufacturer relationships, contract pricing, NET terms
- One-stop-shop positioning: single point of contact from consult through post-sale support
- No commission structure → trust signal; reps recommend what's right, not what pays more
- Ability to absorb SI partnerships (client insists on B&H; SI partners in)
- **Target launch:** Sizzle live September or late August, aligned with B2B hub relaunch

4 — WEBSITE / PLATFORM MIGRATION

Current State & Migration Plan

- **Current stack:** WebLogic (legacy JSP — brittle, hard to update)
- **Migrating to:** Aperture (new B&H; B2B tech stack)
- Aperture enables: social media integration, modular content updates, enhanced UX patterns
- **PM internal deadline:** Architecture handoff by the 15th
- Studio enhancements will be queued in parallel — divide and conquer approach

Page Evolution Roadmap

Phase	Scope
1 — Interim	Reskin current page to match new B2B design system. Fastest path to Aperture.
2 — Enhanced	Extended landing page: case studies, sizzle video embed, social integration.
3 — Standalone	Own Studio brand/site — distinct from B2B hub. Premium, editorial. Like the STC physically.

B2B homepage integration confirmed: The Studio will have a dedicated section on the B2B hub homepage.

5 — PRODUCT CATEGORY STRUCTURE & MERCHANDISING

Key Decisions Needed

- **Finalize category names and count** — 4, 6, or 8 top-level categories? Internal discussion required.
- **Map Studio categories → existing B2C subcategories** — Technical Content team standing by once mapping is provided.
- **Define curation rules** — Not all products in a subcategory belong on the Studio page. Example: Rokinson should not appear. Approach: minimum spec requirements → rule-based filtering → monthly audit.
- **Approval workflow** — New products meeting rules should trigger a flag to a designated approver before going live.
- **Experience type: Landing page vs. listing page** — Consensus toward category landing pages (branded, contextualized) over raw SKU lists.

Current Proposed Categories (Prototype)

- Digital Production
- Broadcast Systems
- Virtual Production (newly added)
- Editing, Color Grading & Post-Production
- Others TBD

Image assets: Current category tile images are mismatched (e.g., camera image under Post-Production). All category images need to be replaced. Victor to source or validate.

NEXT STEPS

Immediate (This Week)

Owner	Task	Deadline
Danielo / Victor	Provide updated category structure + subcategory mapping	Beginning of next week
Danielo / Victor	Provide replacement hero images for each category tile	Before Thursday handoff
Mr. Smith	Confirm Osmo footage extraction workaround; flag to Megan	ASAP

Mr. Smith	Send sizzle structural reference (post-production build template) to group	This week
Danielo	Confirm CIA / Cleveland Institute permissions conversation status	This week

Short-Term (Next 2–4 Weeks)

- Internal Studio team discussion: finalize category taxonomy
- Define curation rules per category (spec minimums); hand to Technical Content
- Identify 1–2 upcoming installs for B-roll / photography capture
- Explore Fullwall / Zero Space Brooklyn shoot — confirm Matthew/Ben availability
- Draft case study template (text + image structure) for 3–5 stories
- Confirm CIA travel feasibility (half-day Cleveland shoot) and budget path
- Get 'by the numbers' metrics from Ben S. (data team) — projects, contracts, markets served

Medium-Term (Q3 — Pre-Launch)

- Aperture migration of Studio page (architecture team dependency)
- Phase 2 landing page live: case studies, sizzle embed, social integration
- Sizzle video production: lock pillars → map footage → produce → deliver by August/September
- Separate Studio brand/site exploration (post-Phase 2)
- NAB standalone booth discussion — revisit when decision is closer to final

OPEN QUESTIONS

- What is the approval process for the CIA case study? Who at the school needs to sign off?
- Is there a content/production budget allocated for case study shoots (travel, photography, video)?
- Who owns the approval workflow for new products appearing on Studio category pages — Danielo?
- Is the NAB standalone booth decision driving any accelerated brand timeline?
- Does Brendan Bailey (back-end PM) need to be looped in on the Aperture migration timeline?
