

K-12 School Safety page

How to access

1. Footer of the K-12 B2B Page
2. Linked in a school safety B2B email

The page will exist as a resource for our K-12 customers around what B&H offers to enhance their school safety. It will include a variety of products that are utilized for school safety (list below created by Rachel). The page will also include educational information about school safety laws, such as Alyssa's Law, to help guide and supply our customers with the correct products for them to be compliant.

CTA on page:

1. Links back to the K-12 portal so customers can easily purchase products
2. For customers who want to get connected with someone there will be a contact page for them to leave their information (name, school, what product /s or project they would like to discuss). This will then be filtered to the correct account manager based on territory for them to further assist the customer.
